Author Index Volume 198

Abbas, P.J., see Miller, C.A. (198) 48, 75
Adrien, J.-L., see Khalfa, S. (198) 87
Agaeva, M.
Velocity discrimination of auditory image moving in vertical plane (198) 1

Barthélémy, C., see Khalfa, S. (198) 87
Beckerman, N.S., see Recanzone, G.H. (198) 116
Bruneau, N., see Khalfa, S. (198) 87

Caravelli, A., Pianese, L., Saulino, C., Di Leva, F., Sequino, L., Cocozza, S., Marciano, E. and Franzé, A.
Down-regulation of otospiralin mRNA in response to acoustic stress in guinea pig (198) 36
Casley, D., see Richardson, R.T. (198) 25
Chen, Y., see Guo, J. (198) 145
Clark, G., see Richardson, R.T. (198) 25
Cocozza, S., see Caravelli, A. (198) 36
Collet, L., see Khalfa, S. (198) 87

Di Leva, F., see Caravelli, A. (198) 36
Dutton, J.A., see Munirathinam, S. (198) 99

Franzé, A., see Caravelli, A. (198) 36

Georgieff, N., see Khalfa, S. (198) 87
Goode, R.L., see Stenfelt, S. (198) 10
Gross, J., see Munirathinam, S. (198) 99
Guo, J. and Chen, Y.
Hearing in American leaf-nosed bats. III: *Artibeus jamaicensis* [Hearing Research 184 (2003) 113–122] (198) 145

Harada, T., see Hirai, S. (198) 41
Hardman, J., see Richardson, R.T. (198) 25
Hato, N., see Stenfelt, S. (198) 10
Hay-McCutcheon, M.J., see Miller, C.A. (198) 75
Heffner, R.S., see Heffner, H.E. (198) 146
Heffner, H.E., Heffner, R.S. and Koay, G.
Reply to the letter of J. Guo and Y. Chen (198) 146
Hetke, J.F., see Miller, C.A. (198) 48
Hirai, S. and Harada, T.
Morphological comparison of apoptotic with non-apoptotic dying cells in the developing inner ear of mouse embryos (198) 41

Jeng, F.-C., see Miller, C.A. (198) 75
Jerger, J. and Martin, J.
Hemispheric asymmetry of the right ear advantage in dichotic listening (198) 125

Kempe, G.S., see Munirathinam, S. (198) 99
Khalfa, S., Bruneau, N., Rogé, B., Georgieff, N., Veuillet, E., Adrien, J.-L., Barthélémy, C. and Collet, L.
Increased perception of loudness in autism (198) 87
Koay, G., see Heffner, H.E. (198) 146
Kuo, S.-W., see Young, Y.-H. (198) 93

Marciano, E., see Caravelli, A. (198) 36
Martin, J., see Jerger, J. (198) 125
Miller, C.A., Abbas, P.J., Hay-McCutcheon, M.J., Robinson, B.K., Nourski, K.V. and Jeng, F.-C.
Intracochlear and extracochlear ECAPs suggest antidromic action potentials (198) 75
Miller, C.A., Robinson, B.K., Hetke, J.F., Abbas, P.J. and Nourski, K.V.
Feasibility of using silicon-substrate recording electrodes within the auditory nerve (198) 48
Minami, S.B., Sha, S.-H. and Schacht, J.
Antioxidant protection in a new animal model of cisplatin-induced ototoxicity (198) 137
Morest, D.K., see Munirathinam, S. (198) 99
Munirathinam, S., Ostapoff, E.-M., Gross, J., Kempe, G.S., Dutton, J.A. and Morest, D.K.
Organization of inhibitory feed-forward synapses from the dorsal to the ventral cochlear nucleus in the cat: a quantitative analysis of endings by vesicle morphology (198) 99

Nourski, K.V., see Miller, C.A. (198) 48, 75

O'Leary, S., see Richardson, R.T. (198) 25
Oghalai, J.S.
Chlorpromazine inhibits cochlear function in guinea pigs (198) 59
Ostapoff, E.-M., see Munirathinam, S. (198) 99

Pianese, L., see Caravelli, A. (198) 36

Recanzone, G.H. and Beckerman, N.S.
Effects of intensity and location on sound location discrimination in macaque monkeys (198) 116
Richardson, R.T., Wise, A., O'Leary, S., Hardman, J., Casley, D. and Clark, G.
Tracing neurotrophin-3 diffusion and uptake in the guinea pig cochlea (198) 25
Robinson, B.K., see Miller, C.A. (198) 48, 75
Rogé, B., see Khalfa, S. (198) 87

Samir Zeftawi, M.
MMN to natural Arabic CV syllables: 1-normative data (198) 69
Saulino, C., see Caravelli, A. (198) 36
Schacht, J., see Minami, S.B. (198) 137
Sequino, L., see Caravelli, A. (198) 36
Sha, S.-H., see Minami, S.B. (198) 137
Stenfelt, S., Hato, N. and Goode, R.L.
Round window membrane motion with air conduction and bone conduction stimulation (198) 10

doi:10.1016/S0378-5955(04)00356-9

Veuillet, E., see Khalfa, S. (198) 87

Wise, A., see Richardson, R.T. (198) 25

Young, Y.-H. and Kuo, S.-W.
Side-difference of vestibular evoked myogenic potentials in healthy subjects (198) 93

HEARING RESEARCH
www.elsevier.com/locate/heares

Subject Index Volume 198

Air conduction
Round window, Vibration pattern, Bone conduction, Middle ear reconstruction (Stenfelt, S. (198) 10)

Antidromic
Auditory nerve, Electrical stimulation, Cochlear implant, Compound action potential, Cat (Miller, C.A. (198) 75)

Apoptosis
Non-apoptotic cell death, Inner ear, Mouse embryo, TUNEL method, Transmission electron microscopy (Hirai, S. (198) 41)

Arabic
MMN, CV syllables, Auditory pathway (Samir Zeftawi, M. (198) 69)

Attentional model
Dichotic listening, Interaural asymmetry, Interhemispheric asymmetry, Right-ear advantage, Structural model (Jerger, J. (198) 125)

Auditory center/surround
Synaptic morphometry, Vesicle morphology, Convolution filters, Imaging, Tuberculo-ventral tract, Axonal tracers, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

Auditory dynamic range
Autism, Loudness, Hyperacusis (Khalfa, S. (198) 87)

Auditory nerve
Cat, Compound action potential, Microelectrode, Neurophysiology, Penetrating electrode, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Electrical stimulation, Cochlear implant, Compound action potential, Cat, Antidromic (Miller, C.A. (198) 75)

Auditory pathway
MMN, Arabic, CV syllables (Samir Zeftawi, M. (198) 69)

Autism
Auditory dynamic range, Loudness, Hyperacusis (Khalfa, S. (198) 87)

Autoradiography
Neurotrophin-3, ^{125}I, Microspheres, Cochlea, Sensorineural hearing loss (Richardson, R.T. (198) 25)

Axonal tracers
Synaptic morphometry, Vesicle morphology, Convolution filters, Imaging, Tuberculo-ventral tract, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

Binaural acoustic stimulation
Side-difference, Vestibular evoked myogenic potential, Relative amplitude, Interaural amplitude difference ratio (Young, Y.-H. (198) 93)

Bone conduction
Round window, Vibration pattern, Air conduction, Middle ear reconstruction (Stenfelt, S. (198) 10)

Cat
Auditory nerve, Compound action potential, Microelectrode, Neurophysiology, Penetrating electrode, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Auditory nerve, Electrical stimulation, Cochlear implant, Compound action potential, Antidromic (Miller, C.A. (198) 75)

Chlorpromazine
Cochlea, Electromotility, Outer hair cell, Cochlear amplifier, Salicylate (Oghalai, J.S. (198) 59)

Cochlea
Neurotrophin-3, ^{125}I, Microspheres, Autoradiography, Sensorineural hearing loss (Richardson, R.T. (198) 25)

Otospiralin, mRNA, Quantitative RT-PCR, Gene expression (Caravelli, A. (198) 36)

Electromotility, Outer hair cell, Cochlear amplifier, Salicylate, Chlorpromazine (Oghalai, J.S. (198) 59)

Cochlear amplifier
Cochlea, Electromotility, Outer hair cell, Salicylate, Chlorpromazine (Oghalai, J.S. (198) 59)

Cochlear implant
Auditory nerve, Electrical stimulation, Compound action potential, Cat, Antidromic (Miller, C.A. (198) 75)

Compound action potential
Auditory nerve, Cat, Microelectrode, Neurophysiology, Penetrating electrode, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Auditory nerve, Electrical stimulation, Cochlear implant, Cat, Antidromic (Miller, C.A. (198) 75)

Convolution filters
Synaptic morphometry, Vesicle morphology, Imaging, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

doi:10.1016/S0378-5955(04)00357-0

CV syllables
MMN, Arabic, Auditory pathway (Samir Zeftawi, M. (198) 69)

Dichotic listening
Interaural asymmetry, Interhemispheric asymmetry, Right-ear advantage, Structural model, Attentional model (Jerger, J. (198) 125)

Differential thresholds to velocity
Psychoacoustics, Moving sound image, Vertical plane (Agaeva, M. (198) 1)

Electrical stimulation
Auditory nerve, Cochlear implant, Compound action potential, Cat, Antidromic (Miller, C.A. (198) 75)

Electromotility
Cochlea, Outer hair cell, Cochlear amplifier, Salicylate, Chlorpromazine (Oghalai, J.S. (198) 59)

Gene expression
Otospiralin, mRNA, Quantitative RT-PCR, Cochlea (Caravelli, A. (198) 36)

Hearing loss
Salicylate, Reactive oxygen species (Minami, S.B. (198) 137)

Hyperacusis
Autism, Auditory dynamic range, Loudness (Khalfa, S. (198) 87)

^{125}I
Neurotrophin-3, Microspheres, Cochlea, Autoradiography, Sensorineural hearing loss (Richardson, R.T. (198) 25)

Imaging
Synaptic morphometry, Vesicle morphology, Convolution filters, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

Inner ear
Apoptosis, Non-apoptotic cell death, Mouse embryo, TUNEL method, Transmission electron microscopy (Hirai, S. (198) 41)

Intensity
Macaque, Sound, Localization (Recanzone, G.H. (198) 116)

Interaural amplitude difference ratio
Binaural acoustic stimulation, Side-difference, Vestibular evoked myogenic potential, Relative amplitude (Young, Y.-H. (198) 93)

Interaural asymmetry
Dichotic listening, Interhemispheric asymmetry, Right-ear advantage, Structural model, Attentional model (Jerger, J. (198) 125)

Interhemispheric asymmetry
Dichotic listening, Interaural asymmetry, Right-ear advantage, Structural model, Attentional model (Jerger, J. (198) 125)

Local circuits
Synaptic morphometry, Vesicle morphology, Convolution filters, Imaging, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Temporal processing (Munirathinam, S. (198) 99)

Localization
Macaque, Sound, Intensity (Recanzone, G.H. (198) 116)

Loudness
Autism, Auditory dynamic range, Hyperacusis (Khalfa, S. (198) 87)

Macaque
Sound, Localization, Intensity (Recanzone, G.H. (198) 116)

Microelectrode
Auditory nerve, Cat, Compound action potential, Neurophysiology, Penetrating electrode, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Microspheres
Neurotrophin-3, ^{125}I, Cochlea, Autoradiography, Sensorineural hearing loss (Richardson, R.T. (198) 25)

Middle ear reconstruction
Round window, Vibration pattern, Air conduction, Bone conduction (Stenfelt, S. (198) 10)

MMN
Arabic, CV syllables, Auditory pathway (Samir Zeftawi, M. (198) 69)

Mouse embryo
Apoptosis, Non-apoptotic cell death, Inner ear, TUNEL method, Transmission electron microscopy (Hirai, S. (198) 41)

Moving sound image
Psychoacoustics, Differential thresholds to velocity, Vertical plane (Agaeva, M. (198) 1)

mRNA
Otospiralin, Quantitative RT-PCR, Cochlea, Gene expression (Caravelli, A. (198) 36)

Neurophysiology
Auditory nerve, Cat, Compound action potential, Microelectrode, Penetrating electrode, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Neurotrophin-3
^{125}I, Microspheres, Cochlea, Autoradiography, Sensorineural hearing loss (Richardson, R.T. (198) 25)

Non-apoptotic cell death
Apoptosis, Inner ear, Mouse embryo, TUNEL method, Transmission electron microscopy (Hirai, S. (198) 41)

Otospiralin
mRNA, Quantitative RT-PCR, Cochlea, Gene expression (Caravelli, A. (198) 36)

Outer hair cell
Cochlea, Electromotility, Cochlear amplifier, Salicylate, Chlorpromazine (Oghalai J.S. (198) 59)

Penetrating electrode
Auditory nerve, Cat, Compound action potential, Microelectrode, Neurophysiology, Peripheral nerve, Silicon (Miller, C.A. (198) 48)

Peripheral nerve
Auditory nerve, Cat, Compound action potential, Microelectrode, Neurophysiology, Penetrating electrode, Silicon (Miller, C.A. (198) 48)

Psychoacoustics
Moving sound image, Differential thresholds to velocity, Vertical plane (Agaeva, M. (198) 1)

Quantitative RT-PCR
Otospiralin, mRNA, Cochlea, Gene expression (Caravelli, A. (198) 36)

Reactive oxygen species
Hearing loss, Salicylate (Minami, S.B. (198) 137)

Relative amplitude
Binaural acoustic stimulation, Side-difference, Vestibular evoked myogenic potential, Interaural amplitude difference ratio (Young, Y.-H. (198) 93)

Right-ear advantage
Dichotic listening, Interaural asymmetry, Interhemispheric asymmetry, Structural model, Attentional model (Jerger, J. (198) 125)

Round window
Vibration pattern, Air conduction, Bone conduction, Middle ear reconstruction (Stenfelt, S. (198) 10)

Salicylate
Cochlea, Electromotility, Outer hair cell, Cochlear amplifier, Chlorpromazine (Oghalai J.S. (198) 59)

Hearing loss, Reactive oxygen species (Minami, S.B. (198) 137)

Sensorineural hearing loss
Neurotrophin-3, ^{125}I, Microspheres, Cochlea, Autoradiography (Richardson, R.T. (198) 25)

Side-difference
Binaural acoustic stimulation, Vestibular evoked myogenic potential, Relative amplitude, Interaural amplitude difference ratio (Young, Y.-H. (198) 93)

Silicon
Auditory nerve, Cat, Compound action potential, Microelectrode, Neurophysiology, Penetrating electrode, Peripheral nerve (Miller, C.A. (198) 48)

Sound
Macaque, Localization, Intensity (Recanzone, G.H. (198) 116)

Structural model
Dichotic listening, Interaural asymmetry, Interhemispheric asymmetry, Right-ear advantage, Attentional model (Jerger, J. (198) 125)

Synaptic morphometry
Vesicle morphology, Convolution filters, Imaging, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

Temporal processing
Synaptic morphometry, Vesicle morphology, Convolution filters, Imaging, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Local circuits (Munirathinam, S. (198) 99)

Transmission electron microscopy
Apoptosis, Non-apoptotic cell death, Inner ear, Mouse embryo, TUNEL method (Hirai, S. (198) 41)

Tuberculo-ventral tract
Synaptic morphometry, Vesicle morphology, Convolution filters, Imaging, Axonal tracers, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

TUNEL method
Apoptosis, Non-apoptotic cell death, Inner ear, Mouse embryo, Transmission electron microscopy (Hirai, S. (198) 41)

Vertical plane
Psychoacoustics, Moving sound image, Differential thresholds to velocity (Agaeva, M. (198) 1)

Vesicle morphology
Synaptic morphometry, Convolution filters, Imaging, Tuberculo-ventral tract, Axonal tracers, Auditory center/surround, Local circuits, Temporal processing (Munirathinam, S. (198) 99)

Vestibular evoked myogenic potential
Binaural acoustic stimulation, Side-difference, Relative amplitude, Interaural amplitude difference ratio (Young, Y.-H. (198) 93)

Vibration pattern
Round window, Air conduction, Bone conduction, Middle ear reconstruction (Stenfelt, S. (198) 10)
